Net Impact				3,075	0	0	0	1,025	1,025	1,025	0

DESCRIPTION

This project provides for a major renovation and expansion of the Public Safety Training Academy (PSTA), the primary training facility for the Department of Police and Fire and Rescue Service (including the site for the Travilah Fire Station). The project will involve renovations to, and expansion of, the Academic Building Complex (ABC) and enhancements including a helipad and renovation of the gym and indoor firing range. ABC expansion areas will contain general classrooms, indoor firing skills training facility, and consolidated office space. Existing space will be renovated and reconfigured to provide general and technical classrooms (such as EMT paramedic, computer, and firearms), a simulations area, a student study center, and expansion and upgrade of the physical training area and locker rooms. A portion of the basement will be renovated as unprogrammed space that will provide a future capability for graphics production and video development and broadcast. A new canine support facility of 1,350 gross square feet will be developed adjacent to the existing Emergency Vehicle Operations Center (EVOC) facility and driving course. The project also includes design and construction of a public safety memorial in coordination with the Public Arts Trust. A memorial site is reserved on the PSTA site with an appropriation of \$150,000. Other site considerations include stormwater management, developing centralized reception/security access for the PSTA, providing overall security for the site, increased parking, and resurfacing of existing pavements. The project also includes improvements to the lighting, mechanical systems, and building envelope to meet Executive Regulation 68-91 AM, Building Design Standards. Subsequent phases, not included in the project at this time, will include replacement and expansion of the Montgomery County Fire and Rescue Service outdoor fire training props, including the burn building, as well as the addition of a lecture hall. The Multi-Agency Driver Training Facility project is included under the General Government section.

Service Area

Countywide

JUSTIFICATION

There have been no major upgrades or renovations to the PSTA since it was completed in 1973. Since its completion, the training needs of the user agencies have changed significantly. As a result, the PSTA is in need of reconfiguration and expansion to meet current and projected training needs. Although some non-public safety agencies and citizens may use this facility for training, public safety agency training is its primary function. Since the completion of the PSTA Academic Complex project POR, a number of events have taken place that demonstrated the need for first responders to be better prepared for such events. The indoor firing range, including its target mechanism, requires modernization and upgrade to bring to current standards. The gym renovation is essential in order to meet the latest required fitness training and the increased number of public safety personnel utilizing the facility. The addition of a helipad allows for one of the most versatile transport vehicles to work from the PSTA.

Plans and Studies

Planning funds from the Facility Planning: Police and Facility Planning: Fire and Rescue projects have been used to develop needs assessment studies, the associated Program of Requirements, and cost estimates. A pedestrian impact analysis has been completed for this project.

Cost Change

Defer project expenditures from FY08 and FY09 to FY10; does not affect project completion.

STATUS

Design for the ABC will be completed by the end of FY06 and construction will begin in FY07.

FISCAL NOTE

This project's schedule has been phased with the Travilah Fire Station project (#450504) in order to complete both projects in a more efficient and cost effective manner.

APPROPRIATION AND EXPENDITURE DATA

Date First Appropriation	FY99	(\$000)
Initial Cost Estimate		10,608
